

CÃ²pies de seguretat al nÃ³vol

Description

CÃ²pies de seguretat al nÃ³vol

Per estalviar espai al nÃ³vol i connexiÃ³, nomÃ©s es guarden les dades mÃ©s importants, com el codi de programaciÃ³, treballs acadÃ¨mics, fitxers de configuraciÃ³ i documents personals importants. Es deixen fora els instalÃ·ladors d'Internet, fitxers temporals, carpetes com node_modules i imatges de mÃaquines virtuals que es puguin tornar a crear. Aquestes cÃ²pies es fan cada dia per als canvis recents, evitant perdre mÃ©s de 24 hores de feina, i un cop a la setmana per tenir una cÃ²pia completa de tot. Per no omplir el disc, les cÃ²pies diÃries es guarden durant una setmana i les setmanals durant un mes, esborrant les mÃ©s antigues de manera automÃtica. Per portar-ho a terme, es tria la plataforma al nÃ³vol (com Google Drive o OneDrive), es configuren les carpetes d'origen i de destÃ i s'executa la cÃ²pia. Finalment, es revisa el registre d'activitat per comprovar que no hi hagi hagut errors i que les cÃ²pies antigues s'hagin eliminat correctament per alliberar espai.

UpdraftPlus: WP Backup & Migration Plugin

Backup, restore or migrate your WordPress website to another host or domain. Schedule backups or run manually. Migrate in minutes.
